</tbody>
</table>

*Indicates toxic chemicals subject to the reporting requirements of section 313 of Title III and of 40 CFR 372.
Information concerning non-hazardous ingredients is considered a trade secret.

3. HAZARDS IDENTIFICATION

Emergency and Hazards Overview:
Viscous colored liquid with slight odor. Vapors are heavier than air and may travel to distant sources. Evaporation rate is slower than ether.

Ratings
Health 2  Flammability 1  Reactivity 1  Protection G

Primary Route of Exposure: Skin X  Inhalation X  Eye X  Ingestion X

Health Effect Information
Eye Contact: May cause eye irritation if wiped or rubbed into eyes.
Skin Contact: May cause skin irritation if wiped or left on the skin
Ingestion: Toxic by ingestion. Gastrointestinal irritation, nausea and vomiting.
Inhalation: Isocyanate vapors or mist at concentrations above the TLV can irritate the mucous membranes in the respiratory tract causing runny nose, sore throat, coughing, chest discomfort, shortness of breath and breathing obstruction. Individuals with a pre-existing, non-specific bronchial hyper reactivity can respond to concentrations below the TLV with similar symptoms as well as asthma attack. Exposure well above the TLV may lead to bronchitis, bronchial spasm and fluid in the lungs. These effects are usually reversible. These symptoms can be delayed up to several hours after exposure. As a result of previous repeated overexposures certain individuals develop isocyanate sensitization which will cause them to react to a later exposure to isocyanate at levels well below the TLV.

4. FIRST AID INFORMATION
Eye Contact: Immediately flush with copious amounts of lukewarm water for at least 15 minutes. Have eyes examined and treated by medical personnel.
Skin Contact:  Dry skin with paper towel or similar. Wash affected skin thoroughly with soap and water. Immediately remove contaminated clothing. Wash contaminated clothing before reuse. Get medical attention if any discomfort continues.

Inhalation:  Move the exposed person to fresh air at once. When breathing is difficult, properly trained personnel may assist affected person by administering 100% oxygen. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

Ingestion:  If swallowed, give 1 to 2 glasses of water to drink and contact a physician immediately. Do not induce vomiting. Decision to induce vomiting should only be made by a physician. Never give anything by mouth to an unconscious person.

Notes to Physician:  This product contains a mixture of aliphatic polamines. This raw material is a pulmonary sensitizer and skin sensitizer.
5. FIRE AND EXPLOSION INFORMATION

Flammable Properties
Flash Point: >200°F Test Method: TCC
Flame extension: NA Test Method: NA
Flammable Limits in Air
Upper Percent: N/A
Lower Percent: N/A
Autoignition Temperature: N/A Test Method: NA
NEPA Classification: H 2 F 1 R 1
Extinguishing Media: CO₂, foam or dry chemicals.

Fire Fighting Measures

Special Fire Fighting Procedures and Equipment: Use water spray to cool containers. If water is used to fight fire, use very large quantities of cold water. Wear NIOSH/OSHA approved, self-contained breathing apparatus and full protective gear.

Unusual Fire and Explosion Conditions: Vapors may be ignited by heat or sparks. Heat-exposed containers may burst. Empty container contains product residues. Do not pressurize, cut, weld, drill, grind or expose containers to heat flame, sparks, static electricity or other sources of ignition. They may explode and cause injury or death.

Hazardous Combustion By-Products: CO, CO₂, Nox, HCN, unburned hydrocarbons.

6. ACCIDENTAL RELEASE MEASURES

Personnel Safeguards: Evacuate all non-essential personnel to safe places. Wear eye, skin and respiratory protection during cleanup. For major spills, emergency responders should wear positive pressure supplied air respirator with full face piece and proper protective gear before entering the affected area.

Regulatory Notifications: Waste of this product is defined as hazardous according to U.S. EPA. Spill reporting requirements and reportable quantities vary by region. Consult all applicable state and local regulations. For Canada, observe all precautions noted above.

Containment and Clean-up: Remove all sources of ignition. Provide ventilation. Respiratory protection is recommended during spill clean-up. Stop leak if possible without risk. Prevent liquids from entering sewers, drains or waterways by diking with sand or earth. Absorb with vermiculite or other absorbent material, then flush area with decontamination solution. Put in open drums. Treat and clean with decontamination solution consisting of water containing 4-8% ammonia and 2% detergent.

7. HANDLING AND STORAGE INFORMATION

Handling: Provide good ventilation. Avoid prolonged contact with the skin. Air circulations and exhaustion of isocyanate vapors must be maintained until the coatings have fully cured to insure that no potential health hazard remains. Use solvent resistant gloves. Avoid rubbing eyes while handling. Respiratory caution to be taken if the cured product is ground or sanded as this may generate irritating dusts.

Storage: Store in cool, dry, ventilated space away from direct sunlight. Keep away from heat, sparks, open flames, electrical equipment, welding torches, pilot lights, etc. Store at 10-30°C

Empty Container Warnings
Drums: Do not reuse empty drums or containers. Do not cut, drill, grind or weld on or near the empty drum.
Plastic: Do not reuse empty containers.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION INFORMATION

Exposure Limits and Guidelines

<table>
<thead>
<tr>
<th>Component</th>
<th>CAS No.</th>

</tr>
<tr>
<td>Titanium dioxide</td>
<td>13463-67-7</td>
<td>10 mg/m³ OSHA TWA, 10 mg/m³ ACGIH TWA</td>
</tr>
</tbody>
</table>

Personal Protective Equipment

Eye/Face Protection: Wear safety goggles
Skin Protection: Use solvent resistant gloves and long sleeved clothing.
Respiratory Protection: If airborne concentrations exceed or are expected to exceed the TLV, use MSHA/NIOSH approved positive pressure supplied air respirator with a full-face piece during application. After application use CCR (Chemical Cartridge Respirator) until material is cured.
Personal Hygiene: Avoid rubbing eyes during handling. Wear chemical tight goggles or full face shield. Use good personal hygiene practices to avoid incidental ingestion.
Engineering Controls/Work Practices
Ventilation: Provide local exhaust or area ventilation to maintain concentration of vapors below TLV
Use explosion proof ventilation equipment. Take care not to draw vapors into occupied office areas or enclosed areas with inhabitants.

Other: Source of clean water should be available in the work area for flushing eyes and skin. Wash thoroughly with soap and water after use and before eating, smoking and using toilet.

### 10. STABILITY AND REACTIVITY INFORMATION

Chemical Stability: Stable under normal conditions. Avoid heat, sparks, flames
Conditions to Avoid: Avoid contact with strong oxidizing materials and bases. Avoid contact with water.
Incompatible Materials to Avoid: Strong oxidizers. Alkali metals.

### 11. TOXICOLOGICAL INFORMATION (will only print available data)

Primary Eye Irritation: Irritating
Primary Skin Irritation: Irritating
Acute Dermal Toxicity: NA
Subacute Dermal Toxicity: NA
Dermal Sensitization: NA
Inhalation Toxicity: NA
Inhalation Sensitization: NA
Oral Toxicity: Mutagenicity: NA
Carcinogenicity: No
Reproductive Toxicity: NA
Teratogenicity: NA
Immunotoxicity: NA
Neurotoxicity: NA
Other: NA
No other toxicological information available

### 12. ECOLOGICAL INFORMATION

Aquatic Toxicity: Not known.
Terrestrial Toxicity: Not known
Chemical Fate and Transport: Not known.
No other ecological information available

### 13. DISPOSAL INFORMATION

Regulatory Information: Consult all regulations (federal, state, provincial, local etc.) or a qualified waste disposal firm when characterizing waste for disposal.
Waste Disposal Methods: Mix the chemical with an inert material such as sand, vermiculite, etc. and place in a suitable container. Dispose of in accordance with Local Authority requirements.

### 14. TRANSPORTATION INFORMATION

DOT Proper Shipping Name: Not Regulated.
IATA Proper Shipping Name: Not Regulated.
IMO Proper Shipping Name: Not Regulated.

The DOT description is provided to assist in the proper shipping classification of this product and may not be suitable for all shipping descriptions.
International Information
Vessel: IMDG Not Regulated
Air: ICAO Not Regulated

*Indicates toxic chemicals subject to the reporting requirements of section 313 of Title III and of 40 CFR 372. Information concerning non-hazardous ingredients is considered a trade secret.

3. HAZARDS IDENTIFICATION

Emergency and Hazards Overview: Combustible clear liquid. In confined spaces or areas with inadequate ventilation or exhaust, vapors may accumulate. Vapors are heavier than air and may travel to distant sources. Harmful if swallowed or inhaled. Overexposure to vapors may cause dizziness, headache, and nausea. The product can cause allergic reaction and irritation of nose, throat and lungs.

Ratings
Health 2  Flammability 1  Reactivity 1  Protection G
Primary Route of Exposure: Skin x  Inhalation x  Eye x  Ingestion x

Health Effect Information
Eye Contact: May injure eye tissue if wiped or rubbed into eyes.

Skin Contact: Corrosive. May cause burns or skin damage if left on the skin.

Inhalation: High concentrations of mist may cause nausea, headache, dizziness, weakness or fatigue. Vapors may cause respiratory tract irritation.

Ingestion: Moderately toxic. Irritation or chemical burns of the mouth, esophagus and stomach can develop following ingestion and injury may be severe.

Medical Conditions Aggravated by Exposure: Prolonged exposure to amines may aggravate allergic reactions to nose, throat and lungs.

4. FIRST AID INFORMATION

Eye Contact: Immediately flush with copious amounts of lukewarm water for at least 15 minutes. Have eyes examined and treated by medical personnel.
Skin Contact: Dry skin with paper towel or similar. Wash affected skin thoroughly with soap and water. Immediately remove contaminated clothing. Wash contaminated clothing before reuse. Get medical attention if any discomfort continues.

Inhalation: Move the exposed person to fresh air at once. When breathing is difficult, properly trained personnel may assist affected person by administering 100% oxygen. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

Ingestion: If swallowed, give 1 to 2 glasses of water to drink and contact a physician immediately. Do not induce vomiting. Decision to induce vomiting should only be made by a physician. Never give anything by mouth to an unconscious person.

Notes to Physician: This product contains a mixture of aliphatic polyamines. This raw material is a pulmonary sensitizer and skin sensitizer.

5. FIRE AND EXPLOSION INFORMATION

Flammable Properties
Flash Point: 200°F  Test Method: TCC
Flame extension: NA  Test Method: NA

Flammable Limits in Air
Upper Percent: NA  Test Method: NA
Lower Percent: NA
Autoinignition Temperature: NA  Test Method: NA

NEPA Classification: H 3 F 2 R 1
Extinguishing Media: CO₂, foam or dry chemicals.

Fire Fighting Measures
Special Fire Fighting Procedures and Equipment: Use water spray only to cool containers. Wear NIOSH/OSHA approved, self-contained breathing apparatus and full protective gear.

Unusual Fire and Explosion Conditions: Vapors may be ignited by heat or sparks. Heat-exposed containers may burst. Material may collect static charges which can cause an incendiary electrical discharge. Empty container contains product residues. Do not pressurize, cut, weld, drill, grind or expose containers to heat, flame, sparks, static electricity or other sources of ignition. They may explode and cause injury or death.

Hazardous Combustion By-Products: CO, CO₂, Nox, HCN, unburned hydrocarbons.

6. ACCIDENTAL RELEASE MEASURES

Personnel Safeguards: Immediately evacuate all non-essential personnel to safe places. Emergency responders should wear proper protective gear before entering the affected area. Observe all precautions noted above.

Regulatory Notifications: Waste of this product is defined as hazardous according to U.S. EPA. Spill reporting requirements and reportable quantities vary by region. Consult all applicable state and local regulations. For Canada, observe all precautions noted above.

Containment and Clean up: Remove all sources of ignition. Avoid sparks, flames, heat and smoking. Ventilate. Stop leak if possible without risk. Prevent liquids from entering sewers, drains or waterways by diking with sand or earth. Absorb with vermiculite or other absorbent material, then flush area with soap and water. Put all waste in open drums.

7. HANDLING AND STORAGE INFORMATION

Handling: Eliminate all ignition sources such as fire, flames, sparks, etc. Provide good ventilation. Avoid prolonged contact which can cause an incendiary electrical discharge. Empty container contains product residues. Do not pressurize, cut, weld, drill, grind or expose containers to heat, flame, sparks, static electricity or other sources of ignition. They may explode and cause injury or death.

Storage: Store in cool, dry, ventilated space away from direct sunlight. Keep away from heat, sparks, and any open source of flames. Store at 10-30° C.

Empty Container Warnings
Drums: Do not reuse empty containers. Do not cut, drill, grind or weld on or near the empty pail or drum.
Plastic: Not applicable
